

Module 8: Implement and Manage Hybrid Identities

Review Question

Review Question 1

An organization you advise has an Azure Directory forest named Tailwind.com.

What do you advise?

- A. From Synchronization Service Manager, run a full import
- B. Run AD Connect and disable staging mode.
- C. Run AD Connect and set the SSO method to Pass-Through authentication.
- D. Run from Azure PowerShell, Start-AdSyncSyncCycle -policyType Initial.

Correct Answer: B

Explanation

Run AD Connect and disable staging mode. AD Connect needs to be taken out of staging mode so that objects are synced.

Review Question 2

An organization you advise has a network that contains an on-premises Active Directory forest named Tailwind.com and contains two domains:

The forest contains user as seen below:

Name: Team_User1

Name: Team _User2

Name: Team _User3

Name: Team _User4

They plan to sync East.Tailwind.com to an Azure AD tenant by using Azure AD Connect.

They need to select an account for Azure AD Connect for the connect to the forest.

Which account do you advise they use?

- A. Team_User1
- B. Team_User2
- C. Team_User3
- D. Team_User4

Correct Answer: D

Explanation

The Team_User4 account. The account they specify on the Connect your directories page must be present in Active Directory prior to installation.
